WORK EXPERIENCE

FrontEnd Developer

omidBank - Tehran — Jul 2024 - Oct 2024

- Optimized the admin panel project by reorganizing new features, resolving bugs, and boosting performance by 65%.
- Spearheaded development and ongoing maintenance for 2 React projects, ensuring code quality and functionality alignment with project goals.
- Played a key role in a refactoring initiative by suggesting and implementing 3 optimizations, enhancing codebase efficiency and maintainability.
- Successfully managed concurrent projects in Vue.js, React, Redux Toolkit, and React Query, demonstrating multitasking abilities and expertise across diverse tech stacks.

FrontEnd Developer — Des 2023 - Jul 2024

IT-Talie, Tehran

- Refactored Yara724.com using Vite, resulting in a 30% improvement in build and reload times.
- Successfully migrated Yara724.com from Nuxt to Vue3, enhancing performance and developer productivity.
- Managed and enhanced functionality across 3 distinct projects by introducing new features, updating styles, and removing deprecated sections, resulting in improved user engagement and streamlined maintenance.
- Implemented camera and microphone access to enable proper media transmission, enhancing user interaction capabilities and overall application functionality.

FrontEnd Developer — Jul 2022 – Jul 2023

Chabok, Tehran

- Developed and maintained UI kit, driving efficiency through refactoring, cleanup, and continuous improvement initiatives.
- Successfully launched and implemented design enhancements for the Chabok website, optimizing SEO and boosting performance metrics.
- Managed and expanded features of the Website panel, enhancing user experience through redesign efforts and ongoing maintenance.
- Upgraded OptionsApi to CompositionApi, improving codebase efficiency and scalability.
- Actively contributed to front-end architecture discussions, optimizing system performance and scalability.
- Implemented ChatGPT for performance monitoring and automated reporting, achieving a 40% increase in data accuracy and reducing manual cleanup tasks by 50%, thereby enhancing team efficiency by 30% monthly.

FrontEnd Developer — Mar 2022 – Jul 2022

Saman Salamt Pajouh, Tehran

- Works on Catalogue and insurance inquiry services of Food and Medicine Organization (Hygiene ministry of Iran).

Internship — Mar 2021 – Mar 2022

- Learnt how to implement a calculator using vanilla javascript and Vue.js for an accounting project to be used as a component.
